

How to download your files to your Android Device

EASIEST METHOD:

STEP ONE: On your Android phone, click on the download link in the email we sent you. Use the Username and Password to go to the page where your downloads are located.

STEP TWO: Tap on the download link. If that does not work, long press the download link and choose “Download” from the menu that opens.

STEP THREE: To access your files, go to your apps and choose Downloads or My Files.

Alternate Method:

STEP ONE: Download the files to your computer.

STEP TWO: Connect your phone to your computer.

STEP THREE: Access your phone through your computer and transfer the files to your phone.

NOTE:

The first method is the easiest. Both methods have been used many times successfully.
